

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) A pocket flashlight ~~(1)~~ having a housing ~~(10)~~ in which a lighting element ~~(11)~~ is integrated and in which control electronics and an energy store ~~(71)~~ are arranged, wherein a light collector ~~(12)~~ for supplying energy to the energy store ~~(71)~~ is integrated in the housing ~~(10)~~, and in that the housing ~~(10)~~ is a one-piece cast part in the form of a monoblock.

2. (Currently Amended) The pocket flashlight as claimed in claim 1, ~~characterized in that~~ wherein the housing ~~(10)~~ is composed of plastic or resin.

3. (Currently Amended) The pocket flashlight as claimed in ~~either of claims 1 or 2, characterized in that~~ wherein the housing ~~(10)~~ is at least partially surrounded by a hollow shell ~~(6)~~, in particular made of metal.

4. (Currently Amended) The pocket flashlight as claimed in ~~one of claims 1 to 3, characterized in that~~ wherein the housing ~~(10)~~ is of square design, in that the lighting

element ~~(11)~~ is integrated in a narrow, short end face of the housing ~~(10)~~ and in that the light collector ~~(12)~~ is arranged in a broad, long side face of the housing ~~(10)~~.

5. (Currently Amended) The pocket flashlight as claimed in claim 4, ~~characterized in that~~ wherein the light collector ~~(12)~~ extends over a substantial portion of the side face of the housing ~~(10)~~.

6. (Currently Amended) The pocket flashlight as claimed in ~~one of claims 1 to 5~~, ~~characterized in that~~ wherein the pocket flashlight ~~(1)~~ is a keyring pendant.

7. (Currently Amended) The pocket flashlight as claimed in claim 6, ~~characterized in that~~ wherein a looped cord in the form of a flexible strap ~~(3)~~ is attached to the pocket flashlight ~~(1)~~, the looped cord having at a first end a first loop ~~(30)~~ for fastening to the pocket flashlight ~~(1)~~, and having at a second end a second loop ~~(31)~~ for leading said strap through a fastening hole ~~(50)~~ in a key ~~(5)~~, and in that the length of the second loop ~~(31)~~ and the length of the looped cord are dimensional such that the second loop ~~(31)~~ can be placed over the pocket flashlight ~~(1)~~ and the first loop ~~(30)~~ in order to hold or remove the key ~~(5)~~.

8. (Currently Amended) The pocket flashlight as claimed in ~~one of claims 1 to 7~~, ~~characterized in that~~ wherein the lighting element ~~(11)~~ is a white light-emitting diode, ~~in~~

~~that wherein~~ the energy store (71) operates a microprocessor (72) which controls a coil (74), and ~~in that wherein~~ the light-emitting diode (11) is connected in parallel with the coil (74).

9. (Currently Amended) The pocket flashlight as claimed in ~~one of claims 1 to 8, characterized in that~~ wherein a transmitter (8) for controlling an external appliance or an external system is arranged in the housing (10).

10. (Currently Amended) The pocket flashlight as claimed in ~~one of claims 1 to 9, characterized in that~~ wherein at least one sensor (9, 9') for detecting environmental influences, in particular an infrared sensor and/or a UV sensor, is arranged in the housing (10).
